State-of-the-art x-rays for patients at DCH

Dorset County Hospital is delighted to announce the arrival of new state-of-the-art x-ray equipment in the Diagnostic Imaging department.

The new x-ray equipment was purchased to replace an older machine due for decommissioning in one of the x-ray rooms at the hospital.

The new equipment will benefit both patients and staff, and features auto-positioning as well as motorised movement.

Sue Tree, Radiology Manager at Dorset County Hospital said: "We hope that the new equipment and the refurbished examination room will improve the experience of patients attending the department.

"We would like to thank all our patients who have been so understanding whilst the new equipment was being installed.

"I would also like to thank all the Diagnostic Imaging staff who have worked extremely hard to minimise disruption to the hospital."
