

Infection Prevention & Control

MRSA Treatment Guidance

Octenisan®

Mupirocin Resistant

(inc. Octenisan® Nasal Gel)

Patient Name:

Hospital number:

Dear Patient

Your MRSA swabs have shown you are colonised or have previously been colonised with MRSA. This means you have MRSA on your skin and/or in your nose, but this is currently causing you no harm.

You have been provided with the treatment you need to clear the MRSA. Please follow the instructions carefully to maximise successful treatment.

To help keep you safe in hospital, you have been given a bottle of special soap to wash with every day.

This helps remove bacteria from your skin and may reduce the risk of infection.

Start using Octenisan® 5 days prior to your admission date.

If you are admitted as an inpatient you will be re-screened in hospital.

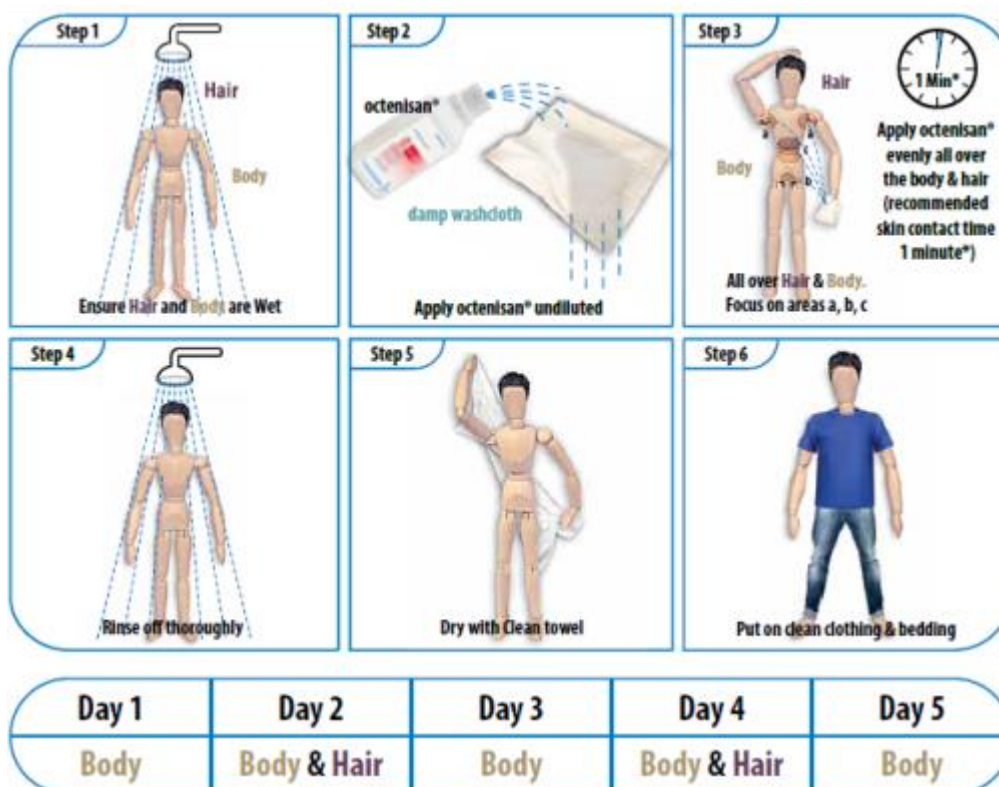

If you are unsure what to do or need help washing, please ask a member of staff.

To be completed by patient daily during treatment:

Octenisan® Body wash	Day 1	Day 2	Day 3	Day 4	Day 5

Octenisan® 5 day antimicrobial wash protocol:

- Apply Octenisan® undiluted onto a disposable, clean, damp washcloth of which you are the sole user.
- Apply evenly all over the body and hair to be cleansed and wash off.
- For showering or hair washing, simply use Octenisan® in the same manner as other hair and skin washing preparations.
- Always observe the recommended contact time of 1 minute.
- Please see the pictured diagram for extra guidance.

To be completed by patient daily during treatment:

Octenisan® Nasal gel		Day 1	Day 2	Day 3	Day 4	Day 5

Octenisan® Nasal gel

Apply to the inside of both nostrils twice a day for 5 days.

Please read the Patient Information Leaflet included in the box with the Octenisan® nasal gel before you begin to use it.

The nasal gel is to be applied to each nostril as described in the Patient Information Leaflet.

Following application of the nasal gel to the inside of the nostrils it is important that the outside of the nose is massaged well. This will ensure the treatment is effective. You may be able to taste the nasal ointment.

If being treated at home, please bring any remaining Octenisan® bodywash and nasal gel into hospital with you.
